Subject: sewage spill

After an incredible campaign of which at t's were crossed and i's were dotted, a rate increase in Tega Cay's water was allowed, even after numerous increases have occurred with no real results.

And here we go again. Another 100,000 gallons **estimated** (amount spilled from 12 midnight until 9 AM) in the cove between Marquesas and Palmyra from the waste water treatment plant. This is the third spill from that site this year.

Is anyone listening? How about we all go down and take a swim?

How about they get a rate increase when they STOP allowing these spills to happen? How about they take a hefty loan to fix the problems, then they can get their increase after to pay the loan off? SC continues to allow them to take increases with no issue taken over the spills.

Enough already. We deserve to have a clean lake and not be raked over financially by a company that isn't doing it's job properly.

Take ACTION. The citizens of Tega Cay are doing all they can.

Thank you.
